

Sea Tracker®

Quick user guide of the GPS Sea Tracker

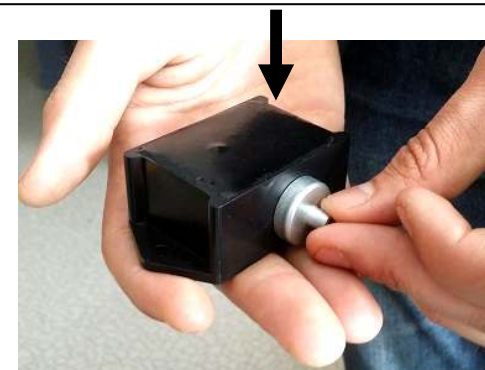

Install the Sea Tracker with resin side up to the sky; no metallic parts above

1

Pair the tracker with your mobile phone by sending PH by SMS* (do only once)

2

Switch ON the tracker with the magnet, as shown in the picture (on the small cross)

3

Click on the Google Maps link sent by SMS at each alert

- message Fix OK means that GPS position is good
- message Fix NOK means that GPS position is not found yet,
- Battery level and external temperature are also displayed

4

To switch OFF the tracker , you must send Off by SMS* (the motion detector is then disabled, you must reactivate with the magnet)

5

When battery is below 3.6V, you must recharge it with the wireless charger

(*): the tracker will send an acknowledge by SMS

Make sure that you receive a Fix OK before immersion into water
